

## Template for Initiating a New App or Tool (“System”) within Frontline Apps

Featured System: **Messaging Tool for Group 1 Apps and Tools (This Document is Version 130718 1106)**

A **SAMPLE ONLY** broad design (one among many possible) for the Featured System into Frontline Apps is highlighted in **red**. The finer detail of and additional options for the Featured App or Tool are not displayed, as this would make the diagram too dense for current purposes. For similar reasons, designs for apps and tools other than the Featured System are likewise not displayed (though they can be imagined as being overlaid, using other colours, on the diagram below).
